FANS

Fans, the easiest, fastest, and most economical way to cool off during hot summer days, await you at Tekzen in a variety of models.

Fans, with their blades spinning with the power from their motors, are extremely effective in cooling the air in the environment. Thanks to the economical, durable, easy-to-maintain and use fans, escaping the oppressive effects of hot summer days becomes very simple.

Fans are designed in various models to meet the needs of everyone seeking coolness. The most popular models of fans include pedestal models, ceiling-mounted models, desktop models, and tower models.

Known as the most economical devices among cooling systems, the electricity consumption of fans varies according to their power capacity. Models range from 35 Watts to up to 120 Watts, and some fans also feature speed adjustment. With this feature, the speed of the models can be set to the desired level to achieve the required coolness. Fans also come in remote-controlled models for convenience, making their use extremely easy. For those with higher expectations from their fans, there are also models with LED screens, timers, and those that emit healthy ions to the environment.

Nearly as effective as an air conditioner, and even more so in some models, you can find various models of fans under the Heating and Cooling category. You can compare the features of dozens of fans to choose the one that best suits your needs. With a fan available for every budget at Tekzen, you can make an easy, fast, and economical purchase to spend the sweltering summer days in a cooler and healthier way.
