Enjoy Your Summer While Focusing on Your Work with eOfis's Flexible Office Solutions

Taking a vacation is a wonderful opportunity to get away from the stressful work life and relax. However, in today's competitive business world, it's not possible to completely disconnect from work for any period. This is where eOfis comes in, offering office solutions that help you stay on top of your work even while on holiday.

As the pioneering brand of the virtual office system in Turkey, eOfis has been providing its customers with virtual office, ready office, and shared office services since 2010, bringing innovative solutions to the office needs of the business world, regardless of sector and scale. Melis Ataç, Corporate Communications Manager at eOfis, mentioned that even during the holiday seasons, it is possible for employees and businesses to keep their work going as the summer season slowly makes its presence felt.

"Today, work life has become independent of place and time. Now, employees can manage their work even when they are not in the office. Therefore, for people who do not want to fall behind in their work while on vacation, virtual offices have become an important option."

Virtual offices provide solutions to office needs such as address, telephone number, mailbox service, and also offer advantages such as flexible working hours, meeting room usage, and secretarial services. Whether on vacation or at home, you can manage your work without falling behind, thanks to virtual offices. Especially for entrepreneurs and small-scale businesses, virtual offices are ideal and cost-effective. Instead of renting a physical office, you only pay for the services you need.

The Privilege of Adjusting Your Work Life to Your Vacation Plans with eOfis

With the widest location network in Turkey, eOfis serves its customers in A+ plaza offices located in prestigious locations. Thus, when you have to be away from your workplace, for instance, on a business trip or on vacation, you are ready to be on top of your work with eOfis whenever you need an office.

By using any eOfis branch in your location without interrupting your holiday program, you save time. If you wish, you can use the meeting room by appointment and meet with your clients in the city you are currently in.

Melis Ataç, Corporate Communications Manager at eOfis, stated that they continue to increase the number of their offices located in central locations across Turkey so that everyone can easily access them, aiming to enhance business efficiency with offices featuring different concepts.

"In today's business world, the flexibility and efficiency of offices are becoming increasingly important. Especially during the summer months, changes in our working environment due to hot weather and vacation plans can occur. While classic office spaces and the routines experienced in the same places every day can distract us from focusing on our work, the flexible office solutions we offer at eOfis can overcome these problems.

One of our most recently opened offices is in Bodrum, one of Turkey's most important holiday destinations. Everyone, especially those planning their holidays in Bodrum, will find the opportunity to work in a stylish and fun environment if they need to continue their work. Moreover, access to eOfis Bodrum is quick and easy. Our office is only 10 minutes away from the marina and the city center."

With different office concepts, eOfis brings modern and innovative approaches to work environments, offering a mansion concept office with its own pier and garden by the sea for better enjoyment of the summer and for increasing work efficiency; and a pavilion concept office surrounded by shops and restaurants, providing many opportunities to make the most of work breaks on hot days.

eOfis also enhances the regional expansion potential of businesses with its extensive office network, offering new office spaces needed as your business grows with up to 80% cost advantages. With the use of virtual offices, ready offices, and shared offices, you eliminate many expenses such as electricity, water, internet, office equipment, kitchen, etc., allowing you to focus on your work and grow more comfortably.
